MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDIAN ECONOMY

With recent global developments contributing to a significant rebalancing of portfolios as a result of rapidly changing risk perceptions and appetites, the Indian macroeconomic environment has looked turbulent during the past year. After a promising start to the decade in 2010-11, with achievements like maintaining GDP growth rate around 8%, bringing down fiscal deficit to 4.8% of GDP as well as containing current account deficit to 2.6%, the fiscal year 2011-12 has been challenging for the Indian Economy. The year started on a note of optimism through impressive growth in exports and high levels of foreign exchange inflows, only to moderate as the year progressed through continued monetary tightening in response to the untamed inflationary pressures. Gradually, high levels of inflation gave way to a slow-down in the growth. Additionally, as fiscal conditions worsened over the year, export numbers were revised in light of data discrepancies leading to a widening of trade deficit. In light of a perceivably weak macro-economic environment, a well-planned economic revival policy from the Government's part is required to get back the Indian Economy on the path to stable and prosperous growth.

CEMENT INDUSTRY STRUCTURE AND DEVELOPMENT

Portland cement

With the hike in interest rates and partial roll back of stimulus programmes Cement demand growth slowed down. Further, heavy rains and severe floods had adverse impact on cement demand growth due to major disruption to the movement of material and construction activities in some regions during second quarter of the fiscal. Demand could not pick up to the expected levels in the third quarter also post festive season due to unseasonal weather conditions.

OUTLOOK

Economy

Though the overall global outlook suggests some moderation in growth in both advanced and emerging economies in 2012, downside risks to India's growth momentum have receded considerably. The inflation outlook, which is being conditioned by both demand side and supply side factors, suggests slow paced moderation in inflation, with the possibility of rigidity at above the comfort level in the near-term.

OPPORTUNITIES AND THREATS

Growth of GDP and cement consumption has a correlation and cement growth is normally 2% over the GDP growth. Demand will be driven by Government's ambitious plans for infrastructure development and its stimulus for enhancing rural income and affordable housing. Strong demand from housing sector is also anticipated arising out of increasing urbanization and higher disposable income of middle class. Though Indian economy has strong fundamentals, it has also witnessed impact of slowdown on growth. If demand growth is hampered due to loss of impetus to implement infrastructure development programmes and/ or escalating inflationary pressures, the oversupply could potentially become a significant issue.

RISKS AND CONCERNS

Concerns to the Indian cement industry are high cost of power & coal/pet coke, high freight cost, inadequate Infrastructure, non-availability of wagons, competitive environment, skilled workers & managerial talent and taxes/royalty levies. Coal is the primary input for Cement production and captive power generation remains the most important cost element for the cement industry.

INTERNAL CONTROL SYSTEMS

Considering the size and nature of activities, the Company has adequate Internal Control System covering both accounting and administrative control. In addition, the internal audit is carried out periodically. The management is ensuring an effective internal control system so that the financial statements and reports give a true and fair view.

SAINIK FINANCE & INDUSTRIES LIMITED

PERFORMANCE DURING THE YEAR

The Company has three divisions

- a) Cement Division;
- b) Finance Division; and
- c) Pole Division

The management's perception and analysis about these three divisions is summed up as follows:

Cement & Pole Division:

During the year under review, your company was engaged in cement & PSC Pole manufacturing activities and also engaged in carrying on the business as Non - Banking Financial Company. Due to the erratic power supply, high per unit cost of captive generation of power, non-availability of quality Lime stone, the Cement Plant could not meet the Economies of Scale. The production of cement & pole plant was reduced since last three years and was became very difficult to run the same. In order to control heavy losses to be incurred to the Company, it was necessary to suspend the production of Cement & Pole division. Therefore, the Board of Directors, vide their resolution passed on 1st June, 2012, has taken decision to suspend the production of the Cement Plant with immediate effect which has culminated into closure of Cement Plant with effect from 31st July, 2012.

Finance Division:

The Finance division of the Company is engaged in financing heavy earth moving equipment like loaders and tippers etc. in various States in India and has retained its competitive edge in the industry. The Company also provides loan syndication facilities besides direct funding to maintain its lead and has an excellent track record in collections & recovery of loan.
